

THANVITH MANJUNATH K

AI & ML ENGINEERING STUDENT

CONTACT

- +91 9448409025
- thanvithmk@gmail.com
- Bengaluru - 560103
- www.linkedin.com/in/thanvith-manjunath-k

SKILLS

- Python Programming
- Java Programming
- JavaScript Programming
- Data Handling Tools
- Leadership
- Team Collaboration
- Critical Thinking

LANGUAGES

- English (Fluent)
- Kannada (Native)
- Tulu (Native)
- Hindi (Conversational)

EXTRACURRICULAR ACTIVITIES

- Leo Club Treasurer**
 - Managed finances and organized community service activities
- Student President**
 - Indraprastha Pre-University College (PUC) – Led and organized college events

PROFILE

Motivated and curious B.E. student specializing in Artificial Intelligence and Machine Learning, with a foundational understanding of programming, data handling and image processing. Actively involved in hackathons and club activities with hands-on experience in team-based projects and volunteering. Eager to apply and expand technical skills while contributing meaningfully to innovative and impactful solutions.

EDUCATION

- B.E. in Artificial Intelligence and Machine Learning** 2023 - Present
New Horizon College of Engineering, Bengaluru
CGPA: 9.66 / 10.0
- Pre-University Course (PUC)** 2021- 2023
Indraprastha Pre-University College, Mangalore
Percentage : 94.83%
- High School (SSLC)** 2009- 2021
Knanaya Jyothi E.M High School, Kadaba
Percentage : 96.8%

PROJECTS

- NHCE WAVES (Ongoing)**
 - Developing an audio communication platform for students, enabling HRD and Admin to share important updates and announcements efficiently.
- AI-Based Crop Recommendation System**
 - Designed a rule-based system to suggest sustainable crops based on soil and regional data. Developed during a hackathon with focus on SDG goals.
- Student Resource Recommender Bot**
 - Created a Python-based bot to analyze student scores and recommend study materials. Automated report generation using CSV and Excel.

RESEARCH PAPER

AI-Enhanced Honeypots for Cyber Threat Mitigation

Co-author, New Horizon College of Engineering (2025)

- Developed an AI-based counter-honeypot system to detect and mislead AI-driven cyberattacks using adversarial ML and deception techniques.
